https://www.linkedin.com/in/mdnaimurrahman36 https://github.com/MNR-Tushar
Dhaka, Bangladesh

Python/Django developer with hands-on experience building production-ready **RESTful APIs** and full-stack web applications. Skilled in backend architecture, **Redis caching, Docker** deployment and payment gateway integration.

Technical Skills

Languages:	**Python**, Java, JavaScript, C, C++
Frameworks:	**Django**, **Django REST Framework**, Flask
Databases:	**PostgreSQL**, **Redis**, SQLite
DevOps:	**Docker**, **GitHub Actions**
Tools:	**Git**, **Postman**, VS Code, **JWT**, Swagger
Task Queue:	**Celery**, Message Broker(Redis)
Frontend:	HTML, CSS, Bootstrap, JavaScript
Interests:	Machine Learning, NLP, RAG

Projects

CR Reviews – University CR Review Platform *Sep 2025 – Nov 2025*

Tech Stack: **Django**, **PostgreSQL**, Cloudinary, SendGrid, HTML, CSS, Bootstrap, JavaScript
Live Demo: https://crreviews.onrender.com Github: https://github.com/MNR-Tushar/crreviews

- Implemented user authentication with email verification, Google **OAuth2** and password reset functionality.
- Developed a rating and review system with anonymity controls and one-review-per-user policy enforcement.
- Built an admin dashboard with statistics, user/CR/review management and monthly analytics charts.
- Integrated **Cloudinary** for optimized image storage and **SendGrid** for transactional email delivery.

UrbanThread – Scalable E-Commerce Backend *Jan 2026 – Jun 2026*

Tech Stack: **Django**, **DRF**, JWT (SimpleJWT), **PostgreSQL**, **Redis**, Celery, **Docker**, **SSLCommerz**, GitHub Actions
Live Demo: https://urbanthread-6nok.onrender.com/api/docs/ Github: https://github.com/MNR-Tushar/UrbanThread

- Built a production-grade REST API with Django REST Framework and **JWT** auth, covering full e-commerce workflows including product catalog, cart, orders, and user management.
- Integrated **SSLCommerz** payment gateway and implemented async email/order pipelines using **Celery + Redis** with Celery Beat for scheduled background jobs monitored via Flower dashboard.
- Containerized the entire stack (Django, PostgreSQL, Redis, Celery) with **Docker Compose** and served via Gunicorn for production deployment.
- Configured GitHub Actions **CI/CD** pipeline for automated testing and deployment to streamline the release workflow.

Student Management System – RESTful API *Nov 2025 – May 2026*

Tech Stack: **Django**, **DRF**, JWT (SimpleJWT), **PostgreSQL**, Swagger, Redis, **Docker**
Github: https://github.com/MNR-Tushar/student_management_system_api

- CRUD across 5 modules (Students, Teachers, Courses, Departments, Enrollments) with **JWT**-secured endpoints.
- Implemented **Redis**-backed caching (15-min TTL) with automatic pattern-based cache invalidation on all writes.
- **Dockerized** with a 5-service Compose setup: Django (Gunicorn), **PostgreSQL**, Redis, Celery Worker and Beat.
- Configured GitHub Actions **CI/CD** pipeline: flake8 lint, migrations, full test suite, then Docker Hub image push.

Education

B.Sc in Computer Science & Engineering *Jan 2023 – Present*

Daffodil International University, Savar

Diploma in Engineering *Aug 2017 – Jun 2021*

Magura Polytechnic Institute, Magura

Achievements

- **3rd Place** – DCC Programming Fest 2021 – Apr 2021
- **13th Place** – DIU Take-Off Programming Contest Spring 2023 (Final) – Jun 2023 | Solved **6** problems.
- **11th Place** – DIU Code Trap Programming Contest Fall 2023 – Feb 2024 | Solved **7** problems.
- **6th Place** – DIU Unlock the Algorithm Preliminary (C Slot) – May 2024 | Solved **5** problems.
- **25th Place** – DIU Unlock the Algorithm Spring 2024 (Final) – Jun 2024 | Solved **3** problems in the final round.
- **Solved 600+ algorithmic problems** across Codeforces, LeetCode, AtCoder, HackerRank and more.
